Yogyakarta, Indonesia

Web Developer with hands-on experience in building full-stack applications using Laravel, React, and PostgreSQL. Skilled in developing responsive interfaces, implementing REST APIs, and designing user-friendly systems. Passionate about creating modern, efficient digital solutions while continuously learning and contributing to a collaborative team environment.

Projects

Finance Dashboard Web App

Aug 2025 - Sep 2025

Tech Stack: Laravel | React | PostgreSQL | Supabase | Railway | Vercel

- Built and deployed a financial management system with authentication, CRUD transactions, and savings goal tracker.
- Backend (Laravel + Railway) with PostgreSQL on Supabase, integrated with React frontend deployed on Vercel.
- Designed interactive dashboards with Recharts and implemented responsive UI with modern glassmorphism style.

Web-based Leave Application System (Skripsi)

Feb 2023 - Jul 2023

Laravel, MySQL, JavaScript

- Built an HR management system that digitalized leave requests, approvals, and record-keeping, replacing manual processes with an online workflow.
- Implemented a secure login system with role-based access for employees and administrators to ensure proper authorization.
- Created an interactive prototype in Figma based on requirement analysis, which guided the final system design and improved usability.
- Conducted black-box testing to verify functionality and applied SDLC methodology to ensure the system met quality and performance standards.

Education

Universitas Kristen Duta Wacana - Yogyakarta, Indonesia

Sep 2019 - Aug 2023

Bachelor of Information Systems, 3.47/4.00

- Relevant Courses : Software Engineering, Data Warehousing, Database Systems, Frontend Engineering, Database Design, Algorithms and Data Structures, Decision Support System, Information Technology Management & Governance
