Yogyakarta, Indonesia

I am an Entry-Level Web Developer with hands-on experience in building full-stack applications using Laravel, React, and PostgreSQL. I specialize in developing responsive interfaces, implementing REST APIs, and designing user-friendly systems. I am passionate about creating modern, efficient digital solutions while continuously learning and contributing to a collaborative and growth-oriented team environment.

Projects

Finance Dashboard Web App   Aug 2025 - Sep 2025
Laravel, React, PostgreSQL

- Developed a financial management application that allows users to record transactions, categorize expenses and income, and track savings goals with automatic updates.
- Created RESTful APIs in Laravel and integrated them with a React frontend, ensuring smooth authentication, CRUD operations, and real-time data synchronization.
- Designed interactive Recharts dashboards for financial summaries and smart insights, helping users analyze spending habits.
- Applied Glassmorphism and responsive design to deliver a modern, professional, and engaging user experience

Web-based Leave Application System (Skripsi)   Feb 2023 - Jul 2023
Laravel, MySQL, JavaScript

- Built an HR management system that digitalized leave requests, approvals, and record-keeping, replacing manual processes with an online workflow.
- Implemented a secure login system with role-based access for employees and administrators to ensure proper authorization.
- Created an interactive prototype in Figma based on requirement analysis, which guided the final system design and improved usability.
- Conducted black-box testing to verify functionality and applied SDLC methodology to ensure the system met quality and performance standards.

Education

Universitas Kristen Duta Wacana - Yogyakarta, Indonesia   Sep 2019 - Aug 2023
Bachelor of Information Systems, 3.47/4.00

- Relevant Courses : Software Engineering, Data Warehousing, Database Systems, Frontend Engineering, Database Design, Algorithms and Data Structures, Decision Support System, Information Technology Management & Govemance

Udemy - Course - Online   Feb 2024 - Mar 2024
Certificate in Complete Web & Mobile Designer : UI/UX, Figma

Work Experience

PT WOM Finance - Jakarta, Indonesia   May 2024 - Oct 2024
Marketing Data Analyst Staff

- Collected, validated, and analyzed sales and customer data using Excel and database tools, which increased reporting accuracy by 15% and reduced errors by 40%.
- Designed and implemented customer segmentation models that supported more targeted and effective marketing campaigns.
- Collaborated with cross-functional teams to align data insights with company goals, ensuring practical and measurable results.

Dewan Perwakilan Rakyat Daerah - Yogyakarta, Indonesia   Sep 2022 - Nov 2022
UI/UX Developer Intern

- Designed a user-friendly digital prototype for an employee leave system in Figma, reducing manual processing time by approximately 25%.
- Worked with a team to digitize SOP workflows, making leave request and approval processes more efficient.
- Conducted requirement analysis with stakeholders to ensure the system addressed user needs effectively.

Skills

- **Soft Skills**: Communication, Attention to Detail, Time Management, Teamwork, Problem Solving
- **Hard Skills**: PHP, Laravel, React, JavaScript, RESTAPI, HTML/CSS, Bootstrap, PostgreSQL, MySQL, Git, Figma
- **Language**: Bahasa Indonesia (Native), English (Conversational)
